J. D. RAHNER, Asst. Gen'l Pass. Agt., ST. AUGUSTINE, FLA.

Now, See Here!

Suppose we talk printing for a few minutes. It's a subject of vital importance to every business man, and should receive attention from everyone. Every merchant uses printed matter of some kind because it pays him to do so—and costs him no more. Why should not the farmer and fruit grower have his printed stationery also? It costs less money in the long run than the old way of buying a package of envelopes and a pad of paper

* PRINTING *

from time to time and gives an air of permanency and reliability to your correspondence that cannot be otherwise secured.

Suppose you take the matter up with us? We can surely please you if anyone can. Our perfect equipment makes it possible to handle any kind of work you may have-a card or booklet with equal facility.

Come in and talk it over.

The Tribune Job Printing Department

Lucie County bstract of Title Company

Is prepared to issue complete Abstracts of Title to all lands in St. Lucie county at the same terms which they have heretofore been issued in Brevard county.

JAMES E. ANDREWS, President

ainting Contracts of all Kinds

Also Kalsomining, Staining, Finishing and Paper Hanging done at the most reasonable price, consistent with good workmanship. All work on the East Coast especially solicited. Let me know what you want and get my estimate on it. Prompt attention given to all work.

L. MOBLEY

A MEDIAEVAL NAVY.

The Queer Implements of Attack and Defense That Were Used.

Very strange to modern eyes would be the armament of Great Britain's mediaeval navy. The very names of many of the implements of attack and defense sound queer. According to the books, in the year 1337 the vessels of the navy were furnished with "espringalds," ancient spring guns; "haubergeons," coats of mail; "bacinets," small helmets; bows, arrows, doublets, targets; "pavises," large shields placed at the sides and serving the double purpose of protection against the sea and against the enemy; lances and "firing barrels." As strly as 1838 cannon formed part of the armament of ships, and about 1372 guns and gunpowder were commonly used. Among the stores belonging to one vessel of that time were three iron cannon with five chambers, a hand gun and three old stone bags, probably for shot. Another ship had an iron cannon with two chambers and one brass cannon with one chamber.

Among other implements of war used at that time were "cannon paviors" or stone shot throwers and "murtherers," which were smaller and threw any kind of shot. There were also "basilisks," "port pieces." "stock fowlers," "sakers" and "bombards." The bombards were of hammered iron, made of bars welded and bound together with iron bands. They threw stone shot weighing between 140 pounds and 195 pounds. A battery of these erected on a slip of land at the naval battle of Chloggia (1380) between the Venetians and the Genoese did great damage. They were loaded overnight and were fired in the morning.

Froissart tells of a bombard used at one of these ancient sieges that "might be heard five leagues off in the daytime and ten at night. The report of it was so loud that it seemed as if all the devils in hell had broken loose." Brass ordnance was first cast in England in the year 1535. The pieces had various names. Many of different caliber were mounted on the same deck, which must have caused great confusion in action in finding for each its proper shot.

THE ESKIMO CANOE.

It Is a Curious Little Craft That Is Cranky. Yet Safe.

It is in Greenland that the hunting ability of the Eskimo reaches its highest development. He has a fine mechanical skill. Bones, ivory, stones, a little driftwood, skins and the sinew of the reindeer are the materials from which he must make his boat and weapons. There is nothing else. Says Greenland traveler: "Of these the Eskimo builds a canoe, its frame of bones and driftwood, its covering of translucent sealskin sewed together with sinew. This kayak is decked over, except for a hole in the middle framed with a wooden ring. The Eskimo wriggles into this hole, his legs extended into the fore part of the boat.

"Round his waist there is a cylinder of sealskin, the lower edge of which draws over the wooden ring and is pulled tight with a thong, making all water tight to the armpits. For heavy weather the cylinder is part of a skin shirt with a hood. Strings tighten this hood to the face and cuffs to the wrists, while a pair of long sleeved mitts protect the hands and arms.

"So rigged a good man can turn his canoe bottom upward and right himself again with sliding strokes of his paddle, for he is as waterproof as a duck. Moreover, his vessel is so flexible that it is almost safe from being crushed in the ice drift and, being limber, is extremely swift when propelled by the double ended paddle.

"On the other hand, the vessel is so cranky that only about two-thirds of the native men have nerve and balance enough to hunt. Only three or four Danes in all Greenland have dared use a kayak."

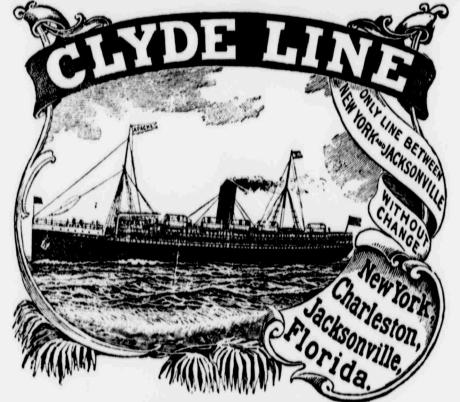

Children Quick and Slow.

"Children of splendid intellectual endowments are sometimes thought to be stupid," says an observing teacher. "The sharp child who learns a lesson in the shortest possible time, who is first with his answers in the mental arithmetic class, who can produce dates and geographical names on demand, is the one the teacher loves, and most commonly he is the one who in after life goes on the safe road to competence, but he is not one of those whose thoughts will be treasured by the world long after he has quitted it. And quite often the so called stupid child is one of the dreamers in whom are the powers of the artist, poet or philosopher struggling for expression."

He Knew His Man.

During the battle of Waterloo there was a frightful panic in Brussels. It was reported that the allies were beat. en, and people were flying in all directions. The Duke of Wellington's cook went on quietly with his duties. He was begged to save himself, but replied, "I have served my master while he fought a hundred battles, and he never yet failed to come to his dinner."

It is an odd fact that the most expert marksman cannot equal the unerring accuracy of the stray bullet in reaching Titusville, Florida the mark.—Baltimore American.
